OBORARUVWE UFUOMA

Fullstack developer

About Me

I am a detail-oriented and highly skilled Fullstack developer with over 4 years of experience in designing and implementing scalable web applications. Proficient in both front-end and back-end technologies, with a strong foundation in HTML, CSS, JavaScript, and multiple backend frameworks such as Node.js and Django. Demonstrated ability to collaborate with cross-functional teams to deliver high-quality, user-friendly solutions. Keen problem-solver with a passion for staying current on emerging technologies and trends in the industry. Proven track record of successfully delivering projects on time and exceeding client expectations.To be honest I'm stronger when it comes to front-end development

Experience

Sivvar Comm
React.js Developer
June 2023 - Present

- Crafting and sustaining web applications utilizing React.js alongside complementary technologies.
- Working closely with diverse teams including designers, product managers, and fellow developers to create outstanding products.
- Implementing responsive design and ensuring cross-browser compatibility.
- Contributing to code reviews and furnishing valuable feedback to fellow developers for continual improvement.
- Additionally, instrumental in enhancing video and voice call functionalities through adept utilization of Sip.js.

Verivo
React.js Developer
November 2023 - Present

- Utilize React.js alongside tools like Redux or MobX for state management, and leverage MongoDB for efficient data persistence. Experience with Express.js for server-side rendering or API development is a plus.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Ensure applications adapt seamlessly to different screen sizes and devices, creating a smooth user experience for everyone. Prioritize accessibility best practices to make applications usable for users with disabilities.
- Actively participate in code reviews, providing constructive feedback to improve code maintainability and catch potential issues early on. Be open to feedback and strive for continuous improvement. Additionally, explore cutting-edge technologies like three.js to create immersive 3D experiences within your web applications

CI Finesser
React Native Developer
January 2022 - February 2023

- I Leverage React Native's framework to create intuitive and performant mobile applications for iOS and Android. This includes writing clean, reusable code and staying up-to-date with the latest React Native advancements and libraries.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Ensure your mobile apps provide a seamless and intuitive user experience across different device sizes and operating systems.
- Actively participate in code reviews, providing constructive feedback to improve code maintainability, catch potential issues early on, and optimize app performance for a smo

Incognito Tech
**Full stack Developer**
January 2023 - Present

- I Utilized React.js and its ecosystem of libraries on the front-end to create user-friendly and interactive interfaces. On the back-end, leverage technologies like Express.js, Node.js, or Python frameworks (Django/Flask) to handle server-side logic and API development. Maintain and optimize databases like MongoDB or PostgreSQL to ensure efficient data storage and retrieval.
- Collaborating with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Ensure applications adapt seamlessly to different screen sizes and devices, creating a smooth user experience for everyone. Prioritize accessibility best practices to make applications usable for users with disabilities.
- I Actively participate in code reviews, providing constructive feedback on both front-end and back-end code to improve maintainability and catch potential issues early on. Be open to feedback and strive for continuous improvement. Explore new technologies and libraries to enhance the application's functionality and user experience.

Education

Aptech Computer Education
ADVANCED DIPLOMA IN SOFTWARE ENGINEERING
February 2021 - February 2024 Lagos, Nigeria

The Advanced Diploma in Software Engineering program at Aptech Computer Education, Lagos, Nigeria, is a meticulously structured and rigorous curriculum designed to impart students with the sophisticated skills and comprehensive knowledge essential for achieving excellence in the domain of software engineering. This program has been instrumental in my learning journey, enabling me to master a wide array of software engineering technologies, including but not limited to JavaScript, ReactJS, Java, C-components (C, C++, C#), Tailwind CSS, Node.js, and numerous other cutting-edge components. Through this program, I have gained a profound understanding of the principles and practices that underpin the development of high-quality software, positioning me to navigate the complexities of the software engineering landscape with confidence and competence.

Skills Summary

Javascript	75%	CSS	85%
React JS	80%	JAVA	50%
Node JS	55%	Figma	65%
Native	70%	Mongoose and SQL	67%

Software

- ThreeJS
- GitHub
- Redux Toolkit
- TypeScript
- Firebase
